ACTIVITY

AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

Please enter the attached written sequence listing (paper copy) and the substitute computer readable form (CRF) of the "Sequence Listing" into the file of the above-referenced application.

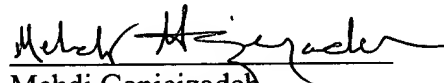

In this submission, features of the Sequence Listing are corrected as indicated in the RAW SEQUENCE LISTING ERROR REPORT provided with the Notice To File Missing Parts mailed November 15, 2001; including the addition of fields 221, 222, and 223 to enumerate the character "n" corresponding to a unknown nucleotide. These fields were inadvertently not included in the original submission of SEQ ID NO:35. Furthermore, the extraneous non-ascii text inadvertently included at the end of originally submitted SEQ NO:35, is deleted by this submission.

Additionally, feature fields 150 and 151 corresponding to priority data are added.

No new matter is added by way of this submission which is being made as a bona fide attempt to fulfill the Sequence Listing requirements enumerated on the Notice To File Missing Parts mailed November 15, 2001.

Respectfully submitted,

Dated: 1/15/02
